Forecast for Monday 13 Nov 2023

Weather: Cloudy with some patchy light rain or drizzle during the early hours before a band of heavy rain arrives from the southwest later in the night. The rain will be accompanied by increasingly strong winds as it moves northeastwards through the day. Into the afternoon heavy rain will continue but with some drier interludes before clearing late afternoon. Potential for a few outbreaks of mainly light rain through the evening but on the whole it will be drier with some clear spells and winds easing.

Chance of cloud-free hill tops above 800m: 30% improving to 60% during the evening.

Low cloud and visibility: Scattered or broken cloud base 500-700m for much of the day, lifting and mostly clearing during the evening. Visibility moderate or poor in heavy rain, good outside of cloud in drier interludes.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Very strong winds, particularly at height, will hamper progress.

Forecast for Tuesday 14 Nov 2023

Weather: There will be a mix of scattered, and at times heavy, showers through the day on Tuesday and drier, brighter spells.

Maximum wind: Southwest 10-15mph, potentially gusting 25-30mph later in the evening.

Chance of cloud-free hill tops above 800m: 40-50%

Low cloud and visibility: Scattered cloud base 500-700m in association with showers through the day. Visibility good out with showers, otherwise reducing to moderate.

Temperature: **Valleys:** Plus 7 rising to plus 11 Celsius
At 800m: Plus 3 to 5 Celsius
Freezing level: Above summits
